CURRICULUM PLAN

Department:

Business Studies.

Vision Statement:

Business Studies gives students an awareness of the world of Business. From the characteristics of an entrepreneur and the ways in which they achieve business success to the marketing strategies that are used to hook us all in (all day everyday in both obvious and more subtle ways!).

Strapline:

"Engaging, Enterprising, Enlightening."

Engaging in Business Studies will produce an enterprising mindset that is enlightened about the Business world that is all around us.

Curriculum Story:

We start in Component 1 with 'Exploring Enterprises.' This gives students an introduction to many key business concepts such as business ownership and business aims. Component 2 "Planning and Presenting a Micro-Enterprise Idea" sees students developing their own business idea and pitching their enterprise as part of the assessment. In Year 11 students begin Component 3 "Marketing and Finance for Enterprise" which culminates with the exam element of the course.

Students who progress onto Level 3 have the opportunity to build upon the concepts introduced in Level 2 and further realise the pertinence of business and the influence that it has in all of our lives.

Skills developed:

Analysis and application are key skills developed in Business Studies. Students will acquire new knowledge in each topic and then "analyse" and "apply" that knowledge to different situations.

Topics	Why we teach this	Links to last topic	Links to future topics		Key skills developed		Cultural capital opportunities	Links to whole school curriculum
Autumn 1: An overview of	of key Business Studies cor	ncepts.						
 Business aims and objectives Business Ownership 	Business aims and objectives are key to the success of an enterprise. It's where entrepreneurial ideas start.	N/A	All business activity links back to aims, objectives and ownership.	•	Analysis Application Evaluation	•	Visit from entrepreneur.

Appendix A: Whole-school Curriculum Vision

OUR CURRICULUM VISION

Colton Hills Community School is an inner-city school with a diverse cohort that draws from a wide range of cultures, nationalities and identities. A significant majority of our students come from working class backgrounds, and many from households where resources can be scarce and access to cultural capital is limited. Our school proudly holds the status of a School of Sanctuary, where students from across the local area – and across the globe, too – can come together to learn harmoniously regardless of their background and upbringing. We are aware of the challenges of our students' lives, but do not use them as an excuse.

Therefore, the intention of our curriculum is that we will offer our students the access to a broad and varied curriculum that seeks to equip them for modern life. We intend it to be knowledge-rich, deep in its explorations of topics, challenging in its delivery and with a distinctive, outward-looking, international feel. We recognised the importance of grounding our curriculum in its wider contexts to enable us to fill gaps in our students' knowledge that they may have when compared to students from more affluent backgrounds, and we are unapologetic in ensuring that our students have every opportunity to engage with as much powerful knowledge as those more fortunate than they are.

With these school contexts in mind, at Colton Hills we have built our curriculum around a series of thematically based Curricular Concepts that students will see in various subjects, enabling them to draw links and supporting them in making connections that might not always be apparent to them.

The intention of our curriculum at all stages is that we will teach all children at the school that:

1 - Humanity is on an optimistic, positive journey of developing tolerance, enfranchisement and rights for all peoples, and we must all play our part in this (SOCIAL JUSTICE) 2 – Diversity is a gift to be valued, one that enriches our school, and that the shared histories of all cultures are worthy of respect and understanding (CULTURAL DIVERSITY) 3 Respect for the law, democracy and its institutions are vital, but that existing power structures should always be respectfully questioned (CIVIC RESPONSIBILITY) - Technological development is full of great human achievement, but is not without its Δ challenges and drawbacks of which we must always be aware (TECHNOLOGICAL PROGRESS) 5 - The natural world is a place of wonder, mystery and beauty that should be respected, revered and protected, particularly in the face of climate change (PRECIOUS PLANET) 6 - Our health – mentally, physically and spiritually – is of primary importance and must be preserved as it contributes immensely to a happy and productive life (HEALTHY LIVING) - Being enterprising and financially independent is crucial, but making money should always be weighed against the moral decisions about who it might affect (ETHICAL ENTERPRISE) - An appreciation of the vast array of creative arts and their power to entertain and educate is vital in an enriched, meaningful and fulfilled life (ARTISTIC CREATIVITY)

Students who leave school with wider awareness of the world around them, with self-respect and with a personal morality will be best able to take advantage of all that life offers, and find their place in the world as a citizen of all of their communities.
